TECH SKILLS

- Languages: Python, PHP, JavaScript
- Frameworks: Frappe, Laravel, React.js
- Automation: n8n, APIs.
- Dev Tools: Git, Docker.

HOBBIES

WORK EXPERIENCE

- AI Automation Specialist | Freelance (EGY/KSA) 2025 - Present

Architecting and deploying autonomous AI agents to streamline complex business logic for enterprises. Focusing on predictive data analysis and integrating Large Language Models (LLMs) into existing workflows to enhance decision-making. Optimizing API orchestration between diverse software ecosystems to ensure scalable automation architecture.

Technologies & Tools: Python, n8n, OpenAI API, Git, Docker.

ERPNext Developer | Freelance (EGY/KSA) - 2024 Present

Leading end-to-end implementation of ERPNext solutions, specializing in custom module development and server-side logic. Designing sophisticated financial/operational reports and customizing core ERP functions to align with GCC business requirements and tax regulations, including ZATCA integration for KSA.

Key Achievement:

Engineered a custom "General Ledger with Voucher Details" script report within the Frappe Framework, overcoming cloud-based server limitations. Developed advanced queries to dynamically map accounting entries with source voucher rows, eliminating manual reconciliation hours and saving thousands of Riyals in annual infrastructure costs.

Technologies & Tools: Python, Frappe Framework, ERPNext, MariaDB, SQL, JavaScript, Linux Server Administration.

Full Stack Developer | GDG & Freelance (Egypt / KSA) | 2020 – Present

Architecting and delivering bespoke, high-performance web applications and scalable architectures for diverse clients across Egypt and KSA.

Providing professional technical support for large-scale platforms and contributing to community-driven projects.

Technologies & Tools: PHP, Laravel, React.js, JavaScript, MySQL, RESTful APIs, GitHub, Tailwind CSS.
