PROFESSIONAL SUMMARY

Senior Full Stack & ERP Developer with 6+ years of experience delivering web applications, ERPNext implementations, and AI-powered automation solutions across Egypt and the GCC. Specialized in Frappe/ERPNext customization, full-stack development (PHP/Laravel & React.js), and enterprise ERP deployments.

Successfully delivered 4 ERPNext go-live projects across manufacturing, trading, real estate, and healthcare. Experienced in ZATCA Phase 1 & Phase 2 compliance, including XML generation, cryptographic stamping, and FATOORA integration, along with 20+ custom applications for fintech, e-commerce, and professional services clients.

Strong expertise in AI workflow automation using n8n and OpenAI APIs, ERP solution design, system integration, and technical leadership. Well-positioned for Senior Full Stack, ERPNext Developer, Technical Lead, and AI Automation Specialist roles across Egypt and GCC markets.

WORK EXPERIENCE

Senior Full Stack Developer

Global Dev Gate | Egypt (On-site)

Oct 2019 – Des 2025

- Delivered 20+ custom web applications for clients across fintech, real estate, e-commerce, and professional services — architecting full-stack solutions using Laravel, React.js, and MySQL from discovery through production deployment.
- Built and launched VIP Accounting System — a multi-tenant SaaS accounting platform with role-based access control, multi-currency ledger, automated PDF financial reporting, and a client portal.
- Developed RESTful API architectures for mobile and third-party integrations — implementing JWT authentication, OAuth2, API versioning, and rate-limiting across multiple production applications.
- Architected and deployed CampaignOS — a bulk email and WhatsApp campaign platform with CSV contact import, template personalisation, delivery tracking, and scheduled campaign execution for multi-channel marketing automation.
- Designed responsive frontends with React.js and TailwindCSS including full Arabic RTL support for GCC client deployments.

Stack: PHP · Laravel · React.js · Vue.js · JavaScript (ES6+) · TypeScript · TailwindCSS · MySQL · RESTful APIs · JWT · OAuth2 · Docker · Git

ERPNext & Frappe Developer

Sky Star | Saudi Arabia | Remote

Jan 2024 – Present

- ▶ Led 4 end-to-end ERPNext implementations across manufacturing, trading, real estate, and healthcare — directing full project lifecycle from requirements workshops and business process mapping through configuration, data migration, user training, and go-live support.
- ▶ Directed ZATCA Phase 1 & Phase 2 e-invoicing compliance for 3 Saudi clients — implementing UBL 2.1 XML generation, ECDSA cryptographic stamping, QR code TLV encoding, and FATOORA portal API integration, achieving full regulatory compliance ahead of mandated deadlines.
- ▶ Engineered custom Frappe modules including multi-branch accounting consolidation, automated VAT return reports, role-based approval workflows, and custom doctypes aligned with GCC business requirements — reducing month-end reporting preparation from 3 days to under 4 hours.
- ▶ Conducted executive-level stakeholder workshops with C-suite and department heads to map existing business processes onto ERPNext workflows, translating operational requirements into phased implementation roadmaps.
- ▶ Managed ERP training and change management programmes for end-user teams across accounting, operations, procurement, and HR departments — coordinating cross-functional adoption and post-go-live hypercare.

KEY ACHIEVEMENT Engineered a custom General Ledger Voucher Detail script report in Frappe/ERPNext for a Saudi manufacturing client — replacing a 3-day manual reconciliation process with a 4-hour automated workflow, reducing month-end accounting close time by 88% and generating estimated annual savings of SAR 40,000+ through optimised MariaDB query architecture.

Stack: ERPNext v14/v15 · Frappe Framework · Python · MariaDB · SQL · JavaScript · Linux · ZATCA API · UBL 2.1 XML

AI Automation Specialist — Legal Workflow Automation

Al-Jasim Law Firm | Kuwait | Contract / Remote

Augst – Oct 2025

- ▶ Designed and deployed an end-to-end AI automation system for a Kuwaiti law firm — automating client intake, document classification, case status notifications, and billing pipeline using n8n orchestration and OpenAI API.
- ▶ Built multi-step agentic AI workflows routing data intelligently across CRM, document management, WhatsApp Business API, and email — eliminating manual coordination across the firm's administrative team.
- ▶ Delivered LLM-powered document extraction enabling automated data capture from unstructured legal contracts, invoices, and correspondence with contextual validation logic.
- ▶ Provided full-lifecycle consulting: requirements analysis, solution design, n8n workflow build, QA testing, client training, and post-deployment monitoring.

Stack: n8n · OpenAI API · Python · REST API · Webhooks · WhatsApp Business API · Docker · JSON

Full Stack Developer & AI Automation Specialist

Nordic Biz Hub | Sweden | Remote

2026 – Present

- ▶ Embedded within a Swedish technology company as an AI Automation and Full Stack specialist — contributing to enterprise workflow automation, ERP integration, and AI-powered product development across Nordic and GCC client engagements.
- ▶ Architected and delivered production-grade automation workflows integrating OpenAI API, n8n, and cloud services — enabling AI-assisted operations across client delivery pipelines.
- ▶ Led technical design and development for web platform projects within the company's portfolio — applying full-stack expertise across Laravel/React.js for client-facing applications.
- ▶ Contributed to technical strategy and solution architecture in a CTO-adjacent capacity — supporting cross-functional teams with technical leadership, code reviews, and documentation standards.

Stack: n8n · OpenAI API · Laravel · React.js · Python · REST API · Docker · Git · ERPNext

SELECTED PROJECTS

VIP ACC System — Multi-Tenant Accounting ERP Platform

SaaS ERP Platform | Accounting & Financial Management

Designed, architected, and developed a fully customised accounting ERP platform from the ground up to support SMEs, startups, and growing businesses requiring advanced financial control, operational flexibility, and real-time business visibility. The platform was engineered as a multi-tenant SaaS solution enabling organisations to manage accounting operations, financial reporting, user permissions, and business workflows through a scalable cloud-based architecture.

Business Impact:

- Eliminated spreadsheet-dependent accounting operations through centralised financial management.
- Improved financial reporting accuracy and operational visibility for business owners and management teams.
- Enabled scalable business growth without the complexity and cost of traditional ERP implementations.
- Demonstrated end-to-end ownership across business analysis, solution architecture, database design, backend development, frontend engineering, reporting systems, API integration, and production deployment.

Stack: *PHP · MySQL · REST API · TailwindCSS · Multi-Tenant SaaS Architecture · Financial Reporting · Role-Based Access Control*

VIP Acc System - Live Demo: moh222salah.github.io/vipsystem

ZATCA Compliance & E-Invoicing Integration Suite for ERPNext

ERPNext / Frappe | Saudi Arabia Compliance

Designed and implemented a complete ZATCA-compliant e-invoicing solution within ERPNext for Saudi organisations requiring full compliance with Phase 1 and Phase 2 regulations.

Business Impact:

- Enabled clients to achieve regulatory compliance ahead of mandated deadlines.
- Automated invoice generation, validation, signing, and clearance workflows.
- Reduced compliance risks and manual intervention in financial operations.
- Demonstrated expertise in ERPNext customisation, financial systems, tax compliance, and enterprise integration architecture.

Stack: *Python · Frappe Framework · ERPNext v14/v15/v16 · MariaDB · UBL 2.1 XML · ECDSA Cryptographic Stamping · TLV QR Encoding · FATOORA API · Linux*

General Ledger Report | Financial Reconciliation Optimization Solution for ERPNext

ERPNext / Frappe | Financial Reporting Optimisation

Engineered an advanced financial reporting solution within ERPNext that dynamically maps General Ledger transactions to underlying source vouchers and accounting documents.

Business Impact:

- Replaced a 3-day manual reconciliation process with an automated 4-hour workflow.
- Reduced month-end financial close time by 88%.
- Generated estimated annual savings exceeding SAR 40,000.
- Demonstrated deep expertise in ERPNext reporting architecture, SQL optimisation, accounting workflows, and enterprise-scale financial systems.

Stack: *Python · Frappe Framework · ERPNext v15 · MariaDB · SQL Query Optimisation · Financial Reporting · Accounting Systems*

Intelligent Invoice Processing & Document Automation Platform

AI Automation | Intelligent Document Processing

Designed and deployed an autonomous AI-powered document processing workflow for a Saudi retail organisation using n8n and OpenAI technologies.

Business Impact:

- Processed 300+ invoices and business documents daily with approximately 91% classification accuracy.
- Reduced manual processing effort from 6 hours to less than 30 minutes per day.
- Eliminated repetitive data-entry activities through intelligent workflow automation.
- Demonstrated expertise in AI integration, process optimisation, workflow orchestration, and digital transformation initiatives.

Stack: *n8n · OpenAI API · Python · REST APIs · Webhooks · Docker · Document Intelligence · Workflow Automation*

AI-Powered Legal Operations Automation Platform

AI Automation · Kuwait Law Firm

End-to-end autonomous workflow system for a Kuwaiti law firm automating client intake, document classification, case notifications, and billing pipeline. Built using n8n and OpenAI API, routing legal documents intelligently across CRM, WhatsApp, and email systems.

Stack: *n8n · OpenAI API · Python · Webhooks · WhatsApp Business API · Docker*

CampaignOS — Multi-Channel Marketing Automation Platform

Automation · MarTech

Bulk email and WhatsApp campaign sender with CSV contact import, template personalisation, delivery tracking, and scheduled campaign execution. Built for multi-channel marketing automation across GCC clients.

EDUCATION

Cairo University | Bachelor of Laws (LL.B.) | 2015

Developed expertise in analytical thinking, business regulations, governance, compliance, contract analysis, and structured decision-making. This foundation directly supports ERP consulting, business process analysis, financial controls, regulatory compliance, and enterprise solution design.

Professional Transition to Software Engineering, ERP & AI Automation | Since 2019

Combining legal, business, and technical expertise to deliver ERP implementations, digital transformation initiatives, AI-powered automation solutions, and scalable enterprise systems across Egypt and the GCC.
