PROFESSIONAL SUMMARY

Senior ERPNext & Full Stack Developer with **5+ years** delivering end-to-end ERP implementations, custom Frappe module development, and AI-powered automation systems across **Egypt, Saudi Arabia, and the UAE**. Completed **3–5 full ERPNext go-lives** across manufacturing, trading, healthcare, and real estate sectors, including **ZATCA Phase 1 & Phase 2 e-invoicing compliance** for Saudi clients. Delivered **20+ custom web applications** using Laravel and React.js, and deployed **6–10 production AI automation workflows** using n8n and OpenAI API. Hybrid technical-functional ERP profile combining deep Frappe/Python development with client-facing business analysis and GCC regulatory expertise. Available for **remote and on-site roles** across KSA, UAE, and Egypt.

WORK EXPERIENCE

ERPNext Developer & ERP Consultant

2024 – Present

Freelance Consultant · Egypt & Saudi Arabia (Remote / On-site)

- Delivered **3–5 end-to-end ERPNext implementations** across manufacturing, trading, and real estate sectors in Egypt and KSA — covering requirements gathering, customization, data migration, user training, and go-live support.
- Designed and deployed **ZATCA Phase 1 & Phase 2 e-invoicing compliance** for Saudi clients, implementing cryptographic stamp generation, QR code encoding, and FATOORA portal integration — ensuring full regulatory compliance ahead of mandated deadlines.
- Built **custom Frappe modules and server-side scripts** for financial consolidation, multi-branch accounting, and automated VAT reporting — reducing month-end reporting time by approximately **70%** for clients previously relying on manual processes.
- Conducted **client-facing business analysis sessions** to map existing workflows onto ERPNext, translating operational requirements into technical specifications and custom doctypes.

KEY ACHIEVEMENT

Engineered a custom **General Ledger Voucher Detail script report** in Frappe/ERPNext for a Saudi manufacturing client — replacing a 3-day manual month-end reconciliation with an automated 4-hour workflow, reducing accounting close time by **88%** and saving an estimated **SAR 40,000+ annually** in labor costs through optimised MariaDB query architecture.

Stack: Python · Frappe Framework · ERPNext v14/v15 · MariaDB · SQL · JavaScript · Linux Server Administration · ZATCA API

AI Automation Specialist

2025 – Present

Freelance Consultant · Egypt & Saudi Arabia (Remote)

- Designed and deployed **6–10 production AI automation workflows** for GCC clients across retail, logistics, and professional services — automating document classification, lead qualification, invoice processing, and customer notification pipelines.
- Integrated **Large Language Models (OpenAI API)** into existing business systems via n8n orchestration, enabling intelligent data extraction and automated decision routing — reducing manual handling workload by an average of **60%** per deployed workflow.
- Architected **multi-step agentic workflows** connecting CRMs, ERPs, and communication platforms (WhatsApp, email) through webhook-driven API orchestration — eliminating repetitive cross-system data entry for client operations teams.

KEY ACHIEVEMENT

Deployed an autonomous **invoice processing and classification agent** for a Saudi retail client using n8n + OpenAI API, processing **300+ documents/day** with **91% classification accuracy** — replacing a full-time data entry position and cutting processing time from 6 hours to under 30 minutes daily.

Stack: Python · n8n · OpenAI API · REST API · Webhooks · Docker · Git · JSON

Senior Full Stack Developer

2020 – Present

Freelance & Project-based · Egypt & Saudi Arabia (Remote / On-site)

- Delivered **20+ custom web applications** for clients across fintech, real estate, healthcare, and e-commerce sectors in Egypt and KSA using Laravel, React.js, and MySQL.
- Architected and built a **multi-tenant SaaS accounting platform (VIP Accounting System)** with role-based access control, multi-currency support, and an integrated PDF reporting engine — currently serving active users across multiple client accounts.
- Built **CampaignOS**, a bulk email and WhatsApp campaign management platform with CSV-based contact importing (SheetJS), real-time delivery tracking, and template personalisation engine.
- Developed **RESTful API architectures** for mobile and third-party integrations, implementing JWT authentication, API versioning, and rate limiting across multiple production applications.

Stack: PHP · Laravel · React.js · Vue.js · JavaScript · MySQL · RESTful APIs · TailwindCSS · GitHub · Docker

SELECTED PROJECTS

VIP Accounting System

SAAS · FINTECH

Multi-tenant cloud accounting platform with role-based access, multi-currency ledger, automated PDF financial reports, and client portal. Live at moh222salah.github.io/vipsystem

Laravel · React.js · MySQL · REST API · TailwindCSS

ZATCA E-Invoicing Integration

ERP · COMPLIANCE

Phase 1 & 2 ZATCA compliance module in ERPNext/Frappe — cryptographic stamp, QR code (TLV encoding), FATOORA portal API, XML generation per ZATCA schema, delivered for 3+ Saudi clients.

Python · Frappe · ERPNext · MariaDB · ZATCA API · XML

CampaignOS

MARTECH · AUTOMATION

Bulk email and WhatsApp campaign sender with CSV contact import (SheetJS), EmailJS integration, template personalisation engine, delivery analytics, and scheduled campaign execution.

JavaScript · SheetJS · EmailJS · WhatsApp API · TailwindCSS

AI Invoice Processing Agent

AI AUTOMATION

Autonomous document classification & routing agent for a Saudi retail client — 300+ invoices/day, 91% classification accuracy, reducing manual processing from 6 hrs to under 30 min/day.

n8n · OpenAI API · Python · Webhooks · REST API

Hunters Growth OS

FULL STACK · SAAS

10-module business operating system with full Arabic RTL support, built as both a production Laravel 11 + React application and a public-facing HTML demo. Covers CRM, task management, and reporting.

Laravel 11 · React.js · MySQL · TailwindCSS · Arabic RTL

General Ledger Custom Report

ERP NEXT · FRAPPE

Custom script report in Frappe/ERPNext dynamically mapping accounting entries to source voucher rows. Replaced 3-day manual reconciliation with 4-hour automated process — saving SAR 40,000+/yr for Saudi manufacturing client.

Python · Frappe · MariaDB · SQL · ERPNext v14

TECHNICAL SKILLS

ERP & FRAPPE

ERPNext v14/v15 · Frappe Framework · Custom Doctypes · Server Scripts · Script Reports · Hooks · REST API · ZATCA E-Invoicing (Phase 1 & 2) · MariaDB · SQL · VAT Compliance

AI & AUTOMATION

n8n · OpenAI API · LLM Integration · Prompt Engineering · Workflow Automation · AI Agents · Agentic Pipelines · Document AI · WhatsApp & Email Automation

BACKEND & API

PHP · Laravel · Python · REST API Design · JWT · OAuth2 · API Versioning · Webhooks · Node.js · JSON · Linux Server Admin

DATABASE & DEVOPS

MySQL · MariaDB · PostgreSQL · Docker · Git · GitHub · Linux · CI/CD (GitHub Actions) · Bash Scripting

FRONTEND

React.js · Vue.js · JavaScript (ES6+) · TypeScript · TailwindCSS · HTML5 · CSS3 · Responsive Design · Arabic RTL

METHODOLOGY & SOFT SKILLS

Agile · Scrum · Business Analysis · Requirements Gathering · Client-Facing Consulting · Technical Documentation · ERP Training & Onboarding

EDUCATION

Bachelor of Laws (LL.B.)

Cairo University · 2015

Career transition to software development — 2019
